

2026 Worker Protection Standards sessions

Worker Protection Standards (WPS) training is required for anyone working in an area that uses pesticides in the production of agricultural crops.

You must register **24 hours** in advance for any session by logging into Ability at <https://orrs.msu.edu/train/>. You must have the learning track in your account before you can sign up for any sessions. Additional information on how to do this can be found here: <https://ehs.msu.edu/occ/wps/index.html>.
